- Real time demand triggers to notify when item stock is running low (replenishment)
- Boost teamwork - sync specialized maintenance, ISO quality safety inspection and logistics functions
- Financial costing and integration with SQL databases and ERP systems

## Supply Chain

Verity software is geared for the field service teams improving KPI inspections, logistics management, inventory Management, tracking movement of equipment and detailed items within distribution centers and work sites, facilitating warehousing, meeting managerial and financial goals.

## Manufacturing: Improving defect rate manufacture/installation process

Verity Software improves manufacturing processes. **Identify** the material source quality. **Measure** materials source quality after stage gates in manufacture process. **Validate** quality and measure components quality. **Validate** the quality of assembled unit output to assure reliability, and First step is to **identify** a structural 1-1 mapping.

## Risk Management

Verity Software makes sure that all aspects of supply chain operation run smoothly. **Assure** availability (Is the business stocked up, able to meet demand?). **Assure** risk management via inspections (Are components well maintained and working properly. Is it accurate?). Is the **information secure** via access management? **Assure** fiscal responsibility, measure to assure lighter weight, integrating with your ERP (SAP, Oracle, Microsoft, etc.).

## Financials

Verity Software helps tracking expenses related supply chain components, **Account management** across multiple sites linking field service, distribution activity to **financial transactions**. Supply chains have a net value, our job is to be prudent stewards of limited resources, making wise investments to promote successful outcomes.

## Software Specifications

**Cloud:** secure private delivery model. **Platform:** Microsoft Windows 7/8/10 support, RHEL/CentOS 6.7-64bit, RHEL/CentOS 6.7x86\_64 (For Stability, QA/Approved). **Database:** MySQL v5.7.10, or Oracle 11G/12C. **Security:** OpenSSL AES-256 Cryptographic Security. **Hosting:** Application server can be hosted on premise or hosted by any cloud hosting provider. **Others:** Shalom ESX security and risk collaboration software also available, (please ask for details).
