

## Verity Symphony 4S software – Early Production Limited release

Warm and special greetings from your software development and solutions delivery team at Nowell Development. We just want to inform you about general availability of the latest version of Verity Symphony 4S (Production) which has been recently released. Software enables supply chain teams to better co-ordinate end-to-end inspection repairs and maintenance of their supply chain manufacturing processes, distribution flows, equipment, materials while boosting risk and prudent financial management

- Improved graphical users interface (with graphing and charting), supporting Qt5 64 bit
- Improved installation modules, using Bitrock Installer latest version 18
- Financials integration allowing for better supply chain expense, income and capital management
- Several bug fixes and messaging improvements
- Support for Oracle 12c, 11g, and MySQL 5.7 database
- Improvements to supply chain maintenance modules
- Enhanced support for distribution channels and customer notifications

A [Youtube video demo](#) of the software is available, and Verity Symphony 4S is now available for download at: <http://www.nowellgroup.com/92526/119637.html>

*“Give thanks to the LORD, for he is good; his love endures forever.” Psalm 107:1*
