What is GRC?

Governance Risk and Compliance

Risk management is about measuring risk to improve outcomes

Governance is driven by company to “do better” for the better

Compliance comes from regulations guaranteeing health, safety, quality, supply chain availability

Policies and procedures drive GRC to “make things better”!

VerityBeyond

Software that helps a team to implement GRC

Define most important standard operating procedures (SOP workflows)

These cybersecurity safety SOPs drive outcomes for various departments: HR, customer care, IT, Service management, maintenance, incident management, supply chain inventory, accounts receivables, accounts payables, safety maintenance

Customer request processing

PRESENTATION TITLE

VerityBeyond – make it SIMPLE

Software allows to define digital SOPs, so that teams can follow them and use them to make the process simpler and better

Helps to streamline processes

Enhance quality of customer service and asset services

Enables a business to track, improve and measure the most important aspects of their operation

Feature areas

Customer onboarding and registration

Customer lifecycle management and request management

Supply chain: multisite multiuser inventory risk management

SOP workflows for processing CX requests

Asset onboarding and management

Asset depreciation and lifecycle management

Asset certifications and maintenance

Advantages

Reduced cost

Improved performance

Better customer experience

Measure what is most important

Enables your business and team to become more successful

Better internal collaboration for simple and complex SOP workflows for customers, processes and assets

Cloud Solution

Web cloud software as a service hosted in the cloud

Easy to use, easy to access with minimal customization

Affordable and can be adapted to multiple use cases

Functional areas: HR, Supply chain, inventory management, customer processing, policy process management, maintenance and risk inspections

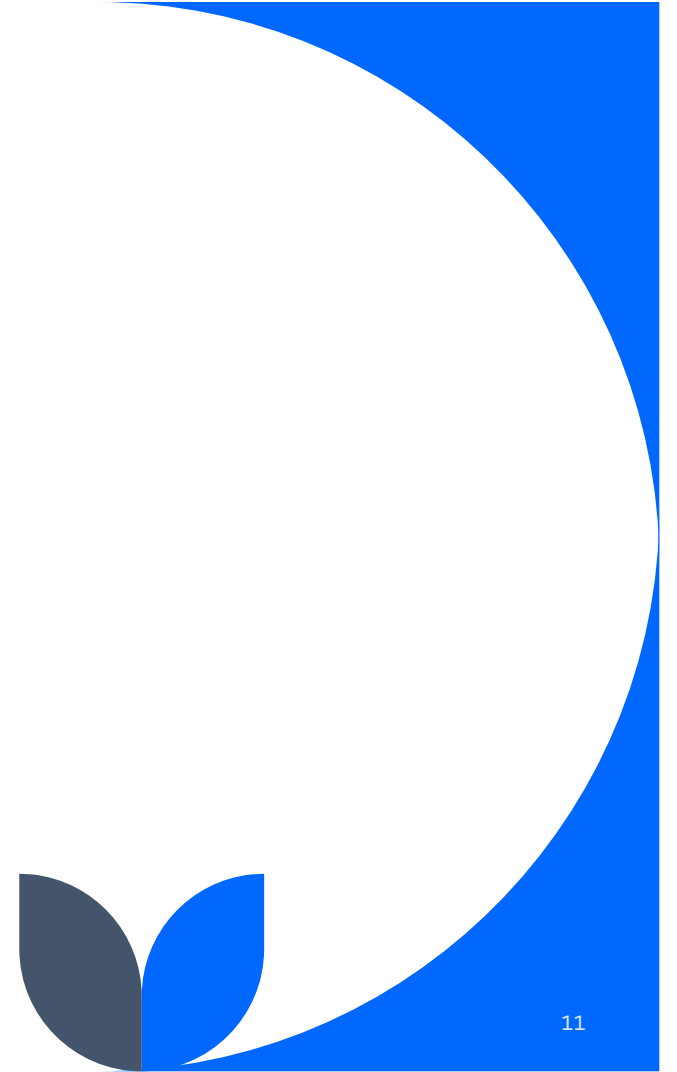

Focus on the most important areas of your business, that affects your customer success
