Verity Symphony

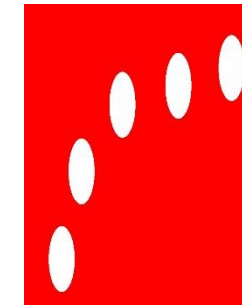

USING SOFTWARE TO BRING EXCELLENCE TO SUPPLY CHAIN RISK MANAGEMENT
MAINTENANCE PROJECTS, FIELD SERVICE INSPECTIONS

Verity software makes it easier for field service maintenance teams to measure key performance indicators in every aspect of their supply chain operations from the integrated level all the way down to the component level. Assure your components are running at the highest level of performance

Manufacturers use our software to measure KPIs at different stage gates of the manufacture process; Engineering teams use our software to measure the health, reliability and sustainability of their facilities, equipment, and service maintenance processes

Teams can now collaborate more effectively to identify root causes, defect analysis, conduct critical inspection of their supply chain components and processes, with the goal of assuring excellence across the end to end supply chain.

Another critical aspect is integrated safety management via inspections; Our software provides a way to design safety inspections for any kind of class or process, and later on run safety inspection runs accordingly

VERITY SYMPHONY SOFTWARE

- FLEX DESIGN SAFETY INSPECTIONS
- SETUP KEY PERFORMANCE INDICATORS
- CARRY OUT SAFETY INSPECTION RUNS
- SHARE RESULTS WITH THE TEAM
- SOFTWARE BOOSTS TEAMWORK
- BOOST CUSTOMER EXPERIENCE
- CO-ORDINATE REPAIR, FIELD SERVICE
- LINK SAFETY INSPECTIONS TO CO-ORDINATE REPAIRS
- ACHIEVE ISO QUALITY EXCELLENCE

Reliable supply chain risk management software for your field service team

VERITY SYMPHONY SOFTWARE

Verity Online software enhances the customer experience and service excellence through team based supply chain risk management. Clients use our solution to boost field service inspections, quality and maintenance of their most complex supply chain infrastructure projects, arranging repairs via seamless digital collaboration

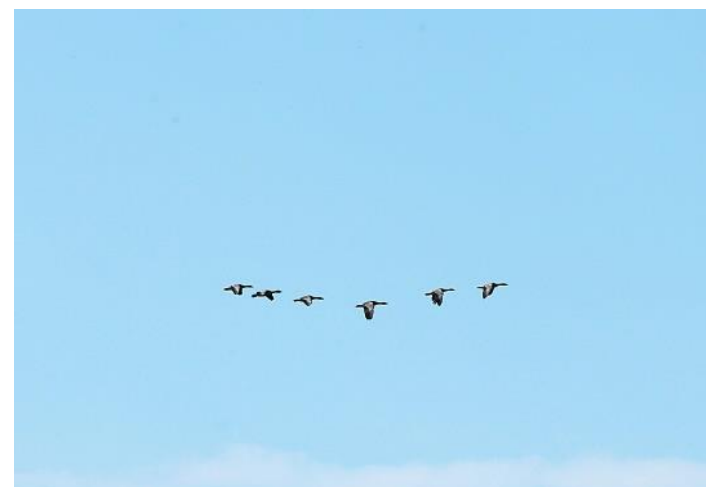

EXPERIENCE, ENTERPRISE SOFTWARE DEPLOYMENT SERVICES

In addition to our software solutions we also help develop and integrate enterprise software solutions for advanced enterprise infrastructure projects, including SailPoint IAM IIQ; Industries we have served include energy, financial services, insurance and industrial engineering providing comprehensive software integration solutions and services

OUR EXPERIENCE, SOFTWARE & TECHNOLOGY CONSULTING PROVIDES A TOTAL END TO END SOLUTION.

TRAINING, SUPPORT, CLOUD APPLICATION MANAGEMENT

In addition, we also provide comprehensive training and support for our software solutions; We teach skills and provide mentorship that enable your teams to use the power of software to boost excellence, enhancing the customer experience

VERITY SYMPHONY

Cloud based software that brings excellence to field service inspections, team collaboration, repair and maintenance of complex supply chain infrastructure projects. Our software is cost-effective and affordable
